

S5

Product Info

- ☞ **Pure vegetable product of native starch.**
In principle anti set-off powders made of native starch are neither soluble in water nor alcohol!
- ☞ The powder particle has a **rounded shape** and is **soft**.
4 graduated granulation's,
unique **uniformity** of the particles
- ☞ lower specific gravity (compared to K4),
tend to static charging
- ☞ **pure unchanged natural product**,
giving no cause for concern to the aspect of health (foodstuff),
starch can lead to allergic reactions in seldom cases
- ☞ suitable for all printing jobs and all kinds of spraying units. An appropriate granulation is available for all uses.

Advantages: Starch powder is low of wearing and does normally not cause problems in downstream converting

Please pay regard! Because of the lower specific gravity the formation of dust in the delivery area and around the press is increased. Starch powder tends to static charging. This problem could be opposed by ionisation.

No safety recommendation are necessary.
